

What is genetic variation? and where does it come from?

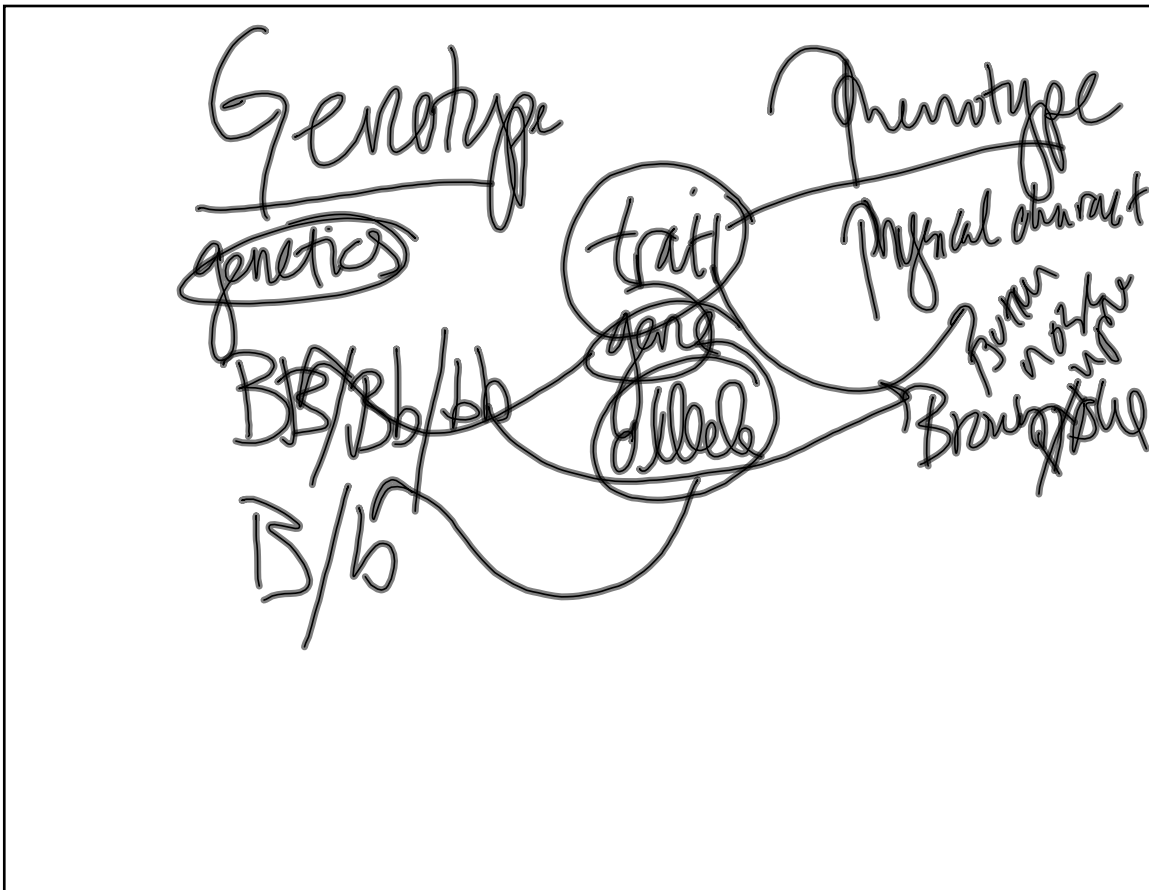

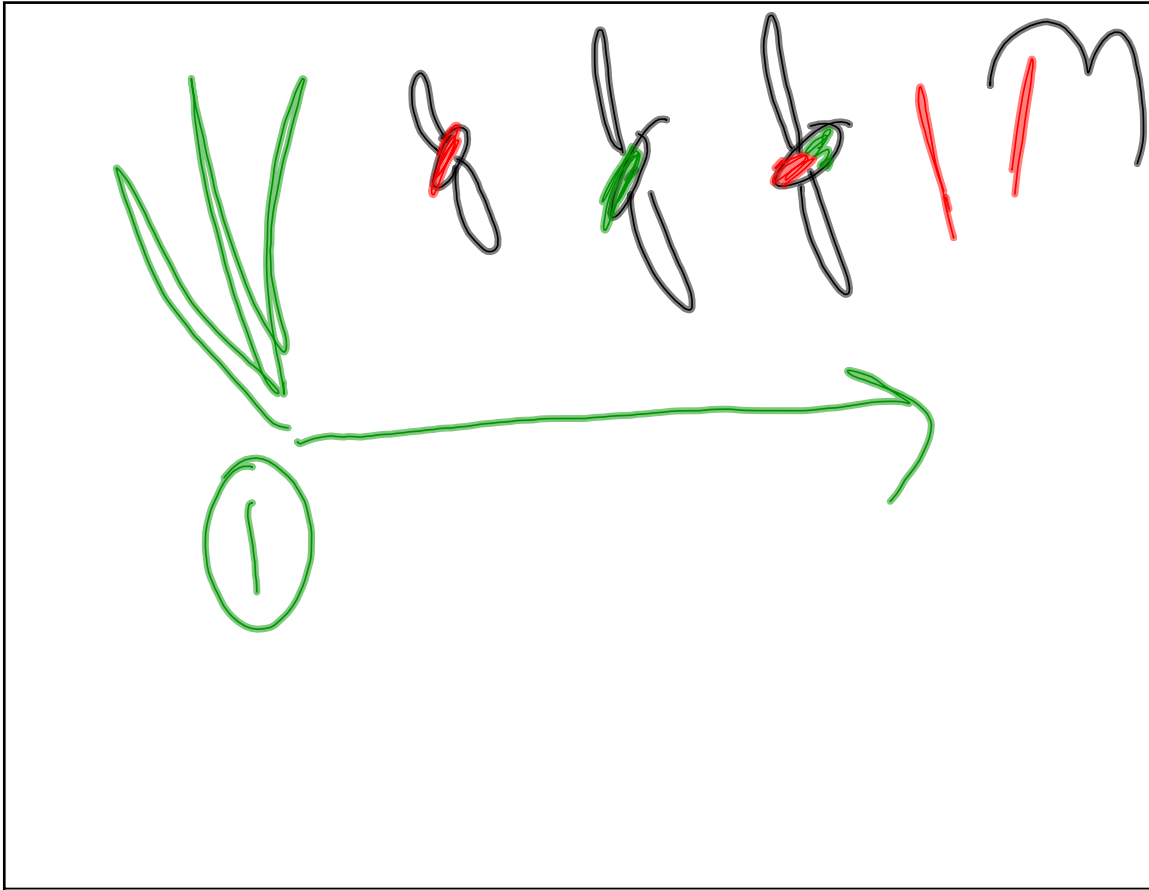

What is genetic variation?

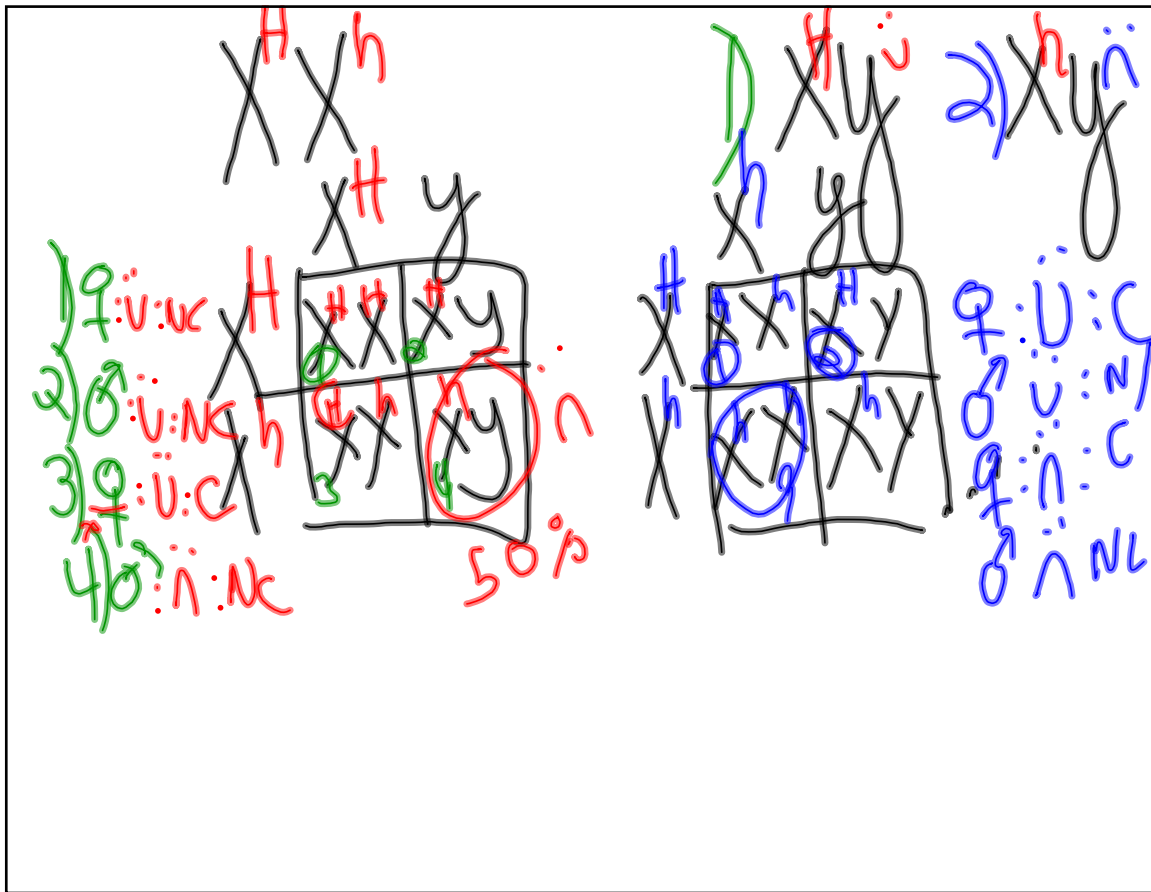

How is the immune system related to genetic variation? - include why genetic variation is a good thing

Pheromones:

In a study of smell testing shirts, women found the smell of males with "the most different" immune genes to themselves more attractive.

Why?

Why is inbreeding not ideal. talk about sex linked traits.

A small handwritten Punnett square is shown on the left, with red markings and a red arrow pointing to it from the text above. The square contains the letters 'h' and 'y' in the top row and 'X' and 'Y' in the left column. The four cells contain 'Xh', 'Xy', 'hX', and 'hY'. The 'Xh' and 'Xy' cells are crossed out with red 'X' marks. To the left of the square, there are red markings including a circled 'h', a circled 'y', and a circled 'n'.
