

## Feeding & Digestion

- Eat: mollusks, kelp, worms, slow-moving/dead animals
- Enzymes help digest food

<b>Sea Stars</b> <small>Video <a href="#">1</a></small>	<b>Urchins</b> <small>Video <a href="#">1,2</a></small>	<b>Sea Cucumbers</b>
Eviscerate: Spit out stomachs and digest externally	<ul style="list-style-type: none"> <li>• 5 part jaw called Aristotle's lantern</li> <li>• Eat kelp, passed to mouth with tube feet</li> <li>• Hard plates and muscles that control protraction of teeth</li> </ul>	Suspension feeders: Eat the organic material out of sand
